Tanuku, Andhra Pradesh (Open to relocate)

EDUCATION

B.Tech, CSE

Dhanekula Engineering College
2021-2025 | Ganguru, Vijayawada
CGPA: 7.40/10

Intermediate, MPC

Vikas Junior College
2019-2021 | Nidadavole
Percentage: 89%

SKILLS

PROGRAMMING Languages

- Advance: Python, JavaScript
- Intermediate: C++

Tools

- GIT • Command Line

Frameworks

- Bootstrap
- Express Js
- React

Technologies

- HTML
- Javascript
- SQLite
- CSS Flexbox
- MongoDB
- CSS

OTHERS

- Data Structures and Algorithms

LANGUAGES KNOWN

- English
- Telugu

EXPERIENCE

Gollamudi Technology & Software: WEB DEVELOPMENT INTERN | Jan 2025 - Ongoing

FULL-STACK NodeJs | ReactJs | MySQL

- Collaborated with a development team to build an online HRMS portal, incorporating features like user registration, login, attendance tracking, and performance reporting. Implemented secure authentication and created user-friendly interfaces with React, enhancing the overall user experience. Worked closely with team members to optimize backend systems using Node.js and Python, and improved database efficiency with MySQL. Conducted comprehensive testing to ensure high performance and security, maintaining robustness under high user loads.

PROJECTS

TODOS APPLICATION:

HTML | CSS | JS | BOOTSTRAP | REACT

- Developed a task tracking system with full CRUD capabilities, including task prioritization, due dates, and status tracking to enhance task management efficiency.
- Created a user-friendly interface using HTML, CSS, and Bootstrap and React for effective task management.
- Engineered interactive UI updates with JavaScript event listeners and DOM operations, optimizing user interaction for 1,500+ monthly users and reducing page load times by 25%, significantly boosting overall user experience.
- Ensured secure task persistence with local storage methods to prevent data loss.

Nxt Trendz (ECommerce Clone)

HTML | CSS | JS | REST API | BOOTSTRAP

- Created a Nxt Trendz E-commerce application with a user-friendly interface to simplify information access and deliver relevant results.
- Built a web application with 50% React JS, 20% JavaScript, 15% CSS/Bootstrap, 10% JWT authentication, and 5% REST API integration, local storage, and routing, achieving seamless user experience and secure functionality.
- Utilized asynchronous fetch GET HTTP API calls for efficient data retrieval and enabled users to open results in a new tab for further exploration.
- Optimised search functionality with advanced filtering options to improve result accuracy and user satisfaction.
